## IT IS 45 CENTS

The Difference Between a Jitney and a Taxicab.

Editor of State Journal: Last evening's State Journal appeared an article which indicated that our city officers were having difficulty in distinguishing between a "jitney" and a "taxicab." As the writer sees it, a "jitney" is a gas propelled vehicle (usually a Ford built in part by former convicts at \$5 per day) which will haul passengers for the modest sum of five cents. It enables

## RAILROAD ENGINEER

Makes Interesting Statement About Many Troubles.

J. B. Jester, of Lawton, Kansas, Gave Up His Position.

## LOST HIS HEARING

Says He Suffered With Catarrh Which Was the Cause.

Tried Tanlac and Claims He Improved in Every Way.

J. B. Jester of Lawton, Kan., a former railroad engineer, made this interesting statement recently:

"I am a happy man now. I had been a sufferer from catarrh of the head, throat and nose which finally affected my stomach. I would wake in the morning with an offensive breath and would go about yawning, spitting and sniffing through the forenoon.

"My eyes watered, my head felt full and my stomach bled. I was about as soon as affected that I had to give up railroading. Pains in my right side and kidneys were frequent. I was tired out and did not enjoy my meals and hardly anything I ate agreed with me. I spent many restless nights trying to sleep soundly.

"I concluded to try this Tanlac, about which I had heard and read so much. After taking two bottles I find that I have greatly improved in every way and I am a happy man now."

"Catarrh of the mucous membranes probably is the most prevalent disease known to mankind. Catarrh of the stomach and kidneys frequently causes dyspepsia and Bright's disease, and catarrhal conditions in the throat and nose lead to inevitable deafness. Frequently the lungs become diseased by the extension of the catarrhal inflammation by way of the bronchial tubes to the lung substance.

"Tanlac was discovered to overcome this very trouble and bring about an astonishing improvement in your spirits, appetite and general condition. Many are testifying to the many benefits derived from the master medicine which is being introduced into this city.

"Tanlac is especially valuable in catarrhal affections of the mucous membranes," states Mr. Pope, the Tanlac man, "which I consider the foundation of most ailments and diseases. People who are affected with catarrh of the head, throat and stomach are generally moody and depressed, with an occasional dull headache, accumulations in the nose and throat, affected memory and a depreciated sense of smell and taste, which finally results in an affected hearing."

"Tanlac can be bought at the Tully-McFarland Drug store, Ninth and Kansas avenue, successors to Matt Weighman, in this city, where W. C. Pope, personally is in charge of explaining the merits of the premier remedy.—Adv.

the ordinary business man and woman, the office man and woman, the clerk, the stenographer, the saleslady and in short the masses of the common people to ride comfortably to and from their place of business and employment for one jitney, five cents, a nickel, half a dime or the twentieth part of a dollar.

A taxicab is likewise a gas propelled vehicle built in a luxurious style by some one other than Henry Ford, which will transport patrons for a minimum of 50 cents per. It is patronized by high officials, financiers and lawyers who collect fees of \$3,325 and upwards for a divided service in a single case. Most of these can more easily afford to pay the 50 cents than the shop girl can afford to pay the five cents. The difference then between a taxicab and a jitney seems to be about 45 cents.

Only yesterday a party of three came in on the Rock Island from the northwestern part of the state. Two of them are taking subordinate places one of our colleges for the season. They departed from the train and carried their half a dozen suit cases to the curb. Here they were solicited to use a taxi. "What will you charge to take us to 316 Blank street in a taxi?" asked one of the trio. "One dollar and fifty cents" responded the driver. The grass people, so they moved along the curb to where a Ford was anchored and asked the same question of its driver. The jitney man considered the distance, counted the cases and then answered "twenty-five cents." In ten minutes the passengers were at their destination. The difference in this case is \$1.25.

The new ordinance imposes a license fee of twenty-five dollars on the vehicle which accommodates 25 per cent. of the passengers. Why should the labor or producing class, and leaves undisturbed the fee of ten dollars on the vehicle which transports only one passenger. Why should the labor or producing class, and leaves undisturbed the fee of ten dollars on the vehicle which transports only one passenger. Why should the labor or producing class, and leaves undisturbed the fee of ten dollars on the vehicle which transports only one passenger.

The driver would be violating the law if he numbered himself with the five passengers. The party does not wish to be separated, consequently awaits the coming of a street car. The car arrives. It is already overcrowded. The seats are full. The aisle is full and the rear platform is full. The motorman stops the car to give the would-be passengers an opportunity to crowd their way in. The gentlemen on the platform courteously remove the cigars from their mouths and hug the rear rail to permit the ladies to squeeze themselves by and into the interior of the car. Once inside, the ladies stand up hanging onto seat handles or grasping the straps above for the entire distance. They are jostled by their fellow passengers and the contents of the lunch baskets are not at all improved by the journey. Now, were it not for the letter of the law four of these young ladies could ride comfortably seated on cushions of the jitney and without burden to any one the fifth one, the "feather weight" of the party, could easily have been cared for and would have found a welcome seat on the lap of one of her friends.

Our commissioners, however, are very to be congratulated because of the very few objectionable features incorporated in the jitney ordinance. In some sister cities laws have been enacted which literally put the jitneys out of business. If the citizens of those towns are conscious of their rights and awake to their duties they will see to it that after the next election the affairs of their city are administered by a different set of city officials.

Respectfully submitted,  
W. B. GASCHER.
